

## ACKNOWLEDGEMENTS

The faculty, staff, and students from the Department of Animal Sciences, Washington State University would like to recognize the following individuals and organizations in appreciation for their continuing support of Wagyu research at WSU.

*The International Program for Agricultural Commodities and Technology (IMPACT)*, directed by *Dr. Desmond O'Rourke* has financially supported this project area since its inception in 1989.

*Max and Thelma Baxter, Flying T Ranch* have supported Wagyu research at the Flying T in Centralia, WA with the donation of their ranch to the Department of Animal Sciences. Special thanks for your support in the cattle gene mapping research project.

*Max Fernandez* from Centerville, WA donated twenty-six head of Wagyu cows and calves to the Department of Animal Sciences for continued Wagyu research.

*Gerry Pittenger, Blue Rock Cattle Company* has supported cattle research at WSU for many years. More recently, he has helped to develop research projects by sponsoring travel for WSU research scientists, donating animals and semen to various WSU research projects, and giving generous financial contributions for this Symposium.

*Richard and Marcie Hammond, Hammond Ranches* generously gave WSU a bull, John B. Good, from the genetic line of Michifuku.

Semen has been donated for the sire evaluation projects and DNA mapping project by *Mr. Kohjun Kaneyama, Mannet Company, Mr. James Scott and John Holdridge of Japanese Venture Partners* and *Mr. Ray Record and Mr. Takeda of Takeda Farms*.

*American Wagyu Association* donated a financial contribution that made this 3<sup>rd</sup> Wagyu Symposium possible.

*Dr. Bruce L. Golden, Center for Genetic Evaluation of Livestock, Colorado State University*, provided software and computing time for EPD computations.

Many other people have contributed both directly and indirectly to this project and we wish to express our appreciation to all of them for their continued support.
